MANAGEMENT'S INTERIM DISCUSSION AND ANALYSIS

FOR THE YEAR ENDED NOVEMBER 30, 2017

COBRA VENTURE CORPORATION
MANAGEMENT'S DISCUSSION AND ANALYSIS
November 30, 2017

DESCRIPTION OF BUSINESS

The following management discussion and analysis of the financial results for the year ended November 30, 2017 (“MD&A”), as provided by the management of Cobra Venture Corporation (the “Company”), should be read together with the Company’s audited annual financial statements for the year ended November 30, 2017 and related notes attached thereto, which are prepared using accounting policies consistent with International Financial Reporting Standards (“IFRS”). All dollar amounts included therein and in the following MD&A are expressed in Canadian dollars except where noted. This Management Discussion and Analysis is dated March 26, 2018.

The Company is an emerging energy company focused on the acquisition, development and production of strategic petroleum and natural gas interests in Western Canada (see discussion below in “Results of Operations”). The recoverability of the amounts shown for petroleum and natural gas interests are dependent upon the existence of economically recoverable reserves, the ability of the Company to obtain necessary financing to complete the development and upon future profitable production. The Company trades on the TSX Venture Exchange under the symbol CBV.

Additional information related to the Company is available for view on SEDAR at www.sedar.com.

PERFORMANCE SUMMARY

The following is a summary of the significant events and transactions that occurred during the period ended November 30, 2017, and up to March 26, 2018:

- On February 6, 2018, the Company announced the resignation of S. Reid MacDonald as a director of the Company, effective January 30, 2018. The Company wishes to thank Reid for his dedication and service as a member of the Company’s Board of Directors. The Company also announced the appointment of Stuart R. Ross to the Board. Stuart has had a distinguished career as a senior officer and director of several public companies, including companies listed on the NASDAQ and TSX Venture exchanges. His sector experience includes mining, beverage production and distribution, medical services, gaming and merchant banking, including 17 years as a senior officer and director of Clearly Canadian Beverage Corp (1986 to 2003). Most recently, Stuart was President and CEO of El Tigre Silver Corporation, a TSX Venture listed silver exploration company (2007 to 2015) and is presently the CEO and President of Cardero Resource Corp.

RESULTS OF OPERATIONS FOR THE THREE MONTH PERIOD ENDED NOVEMBER 30, 2017

Oil and gas revenue for the three month period ended November 30, 2017 was \$225,061 compared to \$124,975 in the comparative three month period ended November 30, 2016. The increase in production revenue was primarily due to the increase in production revenue from the Gull Lake property.

Direct costs for the three month period ended November 30, 2017 were \$157,830 compared to \$165,991 in the comparative three month period ended November 30, 2016. The decrease was primarily a result of differences in depletion base used upon revisions from the technical reports completed for the year ended November 30, 2016.

Operating expenses for the three month period ended November 30, 2017 were \$137,327 compared to \$139,815 in the comparative three month period ended November 30, 2016. The decrease was primarily a result of the decrease in professional fees offset by an increase in management fees incurred in the current period.

RESULTS OF OPERATIONS FOR THE TWELVE MONTH PERIOD ENDED November 30, 2017

Oil and gas revenue for the twelve month period ended November 30, 2017 was \$641,244 compared to \$458,583 in the comparative twelve month period ended November 30, 2016. The increase in production revenue was primarily due to the increase in production revenue from the Gull Lake property.

MANAGEMENT'S DISCUSSION AND ANALYSIS
November 30, 2017

Direct costs for the twelve month period ended November 30, 2017 were \$532,504 compared to \$553,711 in the comparative twelve month period ended November 30, 2016. The decrease was primarily a result of differences in depletion base used upon revisions from the technical reports completed for the year ended November 30, 2016.

Operating expenses for the twelve month period ended November 30, 2017 were \$557,272 compared to \$703,551 in the comparative twelve month period ended November 30, 2016. The decrease was primarily a result of share-based payments of \$103,604, a decrease in professional fees of \$74,415 offset by an increase in management fees of \$21,100 when compared to the same period in the prior year.

PETROLEUM AND NATURAL GAS INTERESTS

Property and Equipment

Willesden Green area, Alberta

During the year ended November 30, 2007, the Company acquired a 40% net working interest in 160 acres of land in Central Alberta for \$18,570.

During the year ended November 30, 2008, the Company acquired an 80% working interest in an oil well located in the Willesden Green area which is subject to applicable royalties, by incurring all costs, risk and expenses associated with completing the test well.

During the year ended November 30, 2009, the Company entered into an arrangement with a private oil and gas operator in the area and the operator agreed to perform some remedial work in the well and prepare and tie-in the well to earn 50% of the Company's interest being a 40% working interest.

During the year ended November 30, 2010, the operator completed its obligations, paid the Company \$460,000 based on a BOE/day calculation and earned its 40% working interest.

During the year ended November 30, 2015, the Company recorded an impairment charge of \$24,454 on the property due to a sustained decline in forecasted crude oil and natural gas prices.

During the year ended November 30, 2017, the Company recorded \$65,307 (2016 - \$68,359) in production revenue.

Davey Lake area, Alberta

During the year ended November 30, 2010, the Company entered into an agreement with RNM Services Ltd. ("RNM") to earn a 13.5% working interest in a well located in the Davey Lake area by incurring all RNM's costs to drill, case, complete and equip and tie-in (or abandon) the well. The Company paid RNM a one-time fee of \$26,250 to enter into this agreement.

During the year ended November 30, 2015, the Company recorded an impairment charge of \$106,374 on the property due to a sustained decline in forecasted crude oil prices.

During the year ended November 30, 2017, the Company recorded \$Nil (2016 - \$6,348) in production revenue.

Gull Lake, Saskatchewan

During the year ended November 30, 2013, the Company entered into a Participation Agreement whereby the Company (and two other arm's length companies) was granted the right to equally participate to drill and complete up to 4 initial test wells (each "Test Well") located in Gull Lake, Saskatchewan. Under the agreement, the Company had to pay 29.33% of the drilling costs of each Test Well to earn a net working interest of 14.665% in each well. The Company currently maintains a 14.665% interest in the Gull Lake project area. As at November 30, 2017, the Company participated in seven wells (2016 – seven).

During the year ended November 30, 2015, the Company recorded an impairment charge of \$664,978 on the property due to a sustained decline in forecasted crude oil prices. The impairment was determined using a value in use approach using estimated expected cash flow based on proved plus probable reserves using a pre-tax discount rate of 10%.

CHANGES IN ACCOUNTING POLICIES

New accounting pronouncements

The following standards have not yet been adopted and are being evaluated to determine their impact on the Company's financial statements. The Company plans to adopt these standards as soon as they become effective for the Company's reporting period.

- 1) New standard IFRS 9, Financial Instruments, classification and measurement is the first part of a new standard on classification and measurement of financial assets that will replace IAS 39, "Financial Instruments: Recognition and Measurement." IFRS 9 has two measurement categories: amortized cost and fair value. All equity instruments are measured at fair value. A debt instrument is at amortized cost only if the entity is holding it to collect contractual cash flows and the cash flows represent principal and interest. Otherwise it is at fair value through profit and loss. This standard is effective for years beginning on or after January 1, 2018.

COBRA VENTURE CORPORATION
MANAGEMENT'S DISCUSSION AND ANALYSIS
November 30, 2017

- 2) New standard IFRS 15, Revenue from Contracts with Customers, provides a single principle-based framework to be applied to all contracts with customers. IFRS 15 replaces the previous revenue standard IAS 18, Revenue, and the related Interpretations on revenue recognition. The standard scopes out contracts that are considered to be lease contracts, insurance contracts and financial instruments. The new standard is a control-based model as compared to the existing revenue standard which is primarily focused on risks and rewards. Under the new standard, revenue is recognized when a customer obtains control of a good or service. Transfer of control occurs when the customer has the ability to direct the use of and obtain the benefits of the good or service. This standard is effective for reporting periods beginning on or after January 1, 2018.
- 3) New standard IFRS 16, Leases, specifies how an IFRS reporter will recognize, measure, present and disclose leases. The standard provides a single lessee accounting model, requiring lessees to recognize assets and liabilities for all leases unless the lease term is 12 months or less or the underlying asset has a low value. Lessors continue to classify leases as operating or finance, with IFRS 16's approach to lessor accounting substantially unchanged from its predecessor, IAS 17. This standard is effective for reporting periods beginning on or after January 1, 2019.

FINANCIAL INSTRUMENTS AND RISK

Fair value

Financial instruments measured at fair value are classified into one of three levels in the fair value hierarchy according to the relative reliability of the inputs used to estimate the fair values. The three levels of the fair value hierarchy are:

- Level 1 – Unadjusted quoted prices in active markets for identical assets or liabilities;
- Level 2 – Inputs other than quoted prices that are observable for the asset or liability either directly or indirectly;
and
- Level 3 – Inputs that are not based on observable market data.

The fair value of the Company's cash and cash equivalents, receivables and accounts payable and accrued liabilities approximate their carrying values.

The carrying value of the Company's financial assets and liabilities approximates their fair value and amortized cost due to their short term maturity or capacity of prompt liquidation.

Financial risk factors

The Company's risk exposures and the impact on the Company's financial instruments are summarized below:

Credit risk

Credit risk is the risk of loss associated with counterparty's inability to fulfill its payment obligations. The Company's credit risk is primarily attributable to trade receivable and cash and cash equivalents. Management believes that the credit risk concentration with respect to trade receivable is not significant and cash and cash equivalents is remote as it maintains accounts with highly-rated financial institutions.

Liquidity risk

The Company's approach to managing liquidity risk is to ensure that it will have sufficient liquidity to meet liabilities when due. As at November 30, 2017, the Company had a cash and cash equivalents balance of \$2,229,293 (2016 - \$2,611,012) to settle current liabilities of \$49,055 (2016 - \$59,877). All of the Company's financial liabilities have contractual maturities of 30 days or due on demand and are subject to normal trade terms.

Market risk

Market risk is the risk of loss that may arise from changes in market factors such as interest rates, foreign exchange rates, and commodity and equity prices.

COBRA VENTURE CORPORATION
MANAGEMENT'S DISCUSSION AND ANALYSIS
November 30, 2017

a) *Interest rate risk*

The Company's cash equivalents consist of a term deposit of \$2,215,000 (2016 - \$2,560,000) at an interest rate of 0.55% (2016- 0.65%). Since the term deposit is cashable anytime, the Company believes it is not exposed to significant interest rate risk. The interest rate risk on the Company's obligations is not considered significant.

b) *Foreign currency risk*

The Company conducts its activities in Canada with Canadian dollars. Therefore, the Company believes it is not exposed to foreign currency risk.

c) *Price risk*

The Company has limited exposure to price risk with respect to commodity and equity prices. Equity price risk is defined as the potential adverse impact on the Company's earnings due to movements in individual equity prices or general movements in the level of the stock market. Commodity price risk is defined as the potential adverse impact on earnings and economic value due to commodity price movements and volatilities.

CAPITAL MANAGEMENT

The Company's objective when managing capital is to safeguard the entity's ability to continue as a going concern. In the management of capital, the Company monitors its adjusted capital which comprises all components of equity (i.e. capital stock, reserves, and retained earnings).

The Company sets the amount of capital in proportion to risk. The Company manages the capital structure and makes adjustments to it in the light of changes in economic conditions and the risk characteristics of the underlying assets. In order to maintain or adjust the capital structure, the Company may issue common shares through private placements. The Company is not exposed to any externally imposed capital requirements.

There were no changes in the Company's approach to capital management during the year ended November 30, 2017.

OTHER

BOE Presentation – For the purposes of calculating unit costs, natural gas is converted to a barrel of oil equivalent (BOE) using six thousand cubic feet equal to one BOE unless otherwise stated. A BOE is a very approximate comparative measure that, in some cases, could be misleading, particularly if used in isolation.

BOE means Barrels of Oil Equivalent. A barrel of oil equivalent is determined by converting a volume of natural gas to barrels using the ration of six (6) mcf to one (1) barrel. BOEs may be misleading, particularly if used in isolation. The BOE conversion ration of six (6) mcf: one (1) bbl is based on an energy equivalency methods primarily applicable at the burner tip and does not represent a value equivalency at the wellhead.
